postgrad, or staff. Priority
for IFS and MacDiarmid
postgrads.

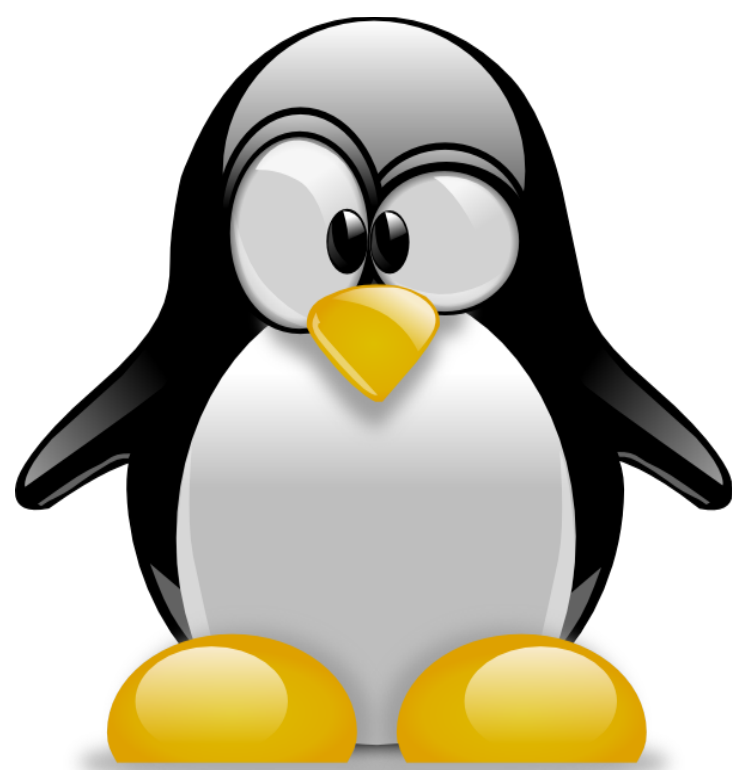

open source WORKSHOP

Friday 17th October
15.00-18.00*pm

Venue: Science Tower ScB3.31
Massey University, Palmerston
North

*: end time is flexible.
You can drop out after the Linux installation.

LINUX INSTALLATION AFTERNOON PARTY

Bring your laptop, with Windows or Mac, and get a fresh install of Ubuntu on it.
We'll guide you to install it using:

- A) **Virtual Machine.** Double click from your operating system to access Linux.
 - B) **Dual boot.** Unleash all the linux fun making a partition of your hard-drive, choosing at boot between operating systems (HD backup recommended).
 - C) Just explore and have fun with a **Live CD** of Linux, nothing will be installed.
- Basic Linux Tutorial during the installation.

Discover **GitHub**, the online platform where the open source happens.
Version control, social coding, interaction, and the fastest community
development ever. Also the place to share science-related code, with lot
of open projects.

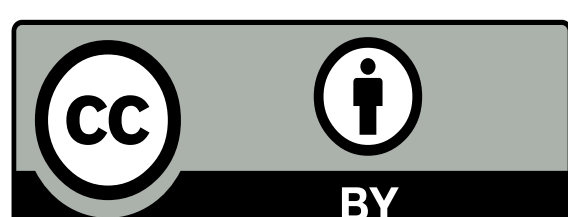

zotero

Zotero is the open source brilliant solution to have those tons of PDF
research papers under control.
EndNote? Mendeley? Explore the open-source, fast-growing alternative to
keep a tidy library!
